

Triaxis Extreme Hi Flow Hydraulic Bear Anchor

Patent Pending

The Bear Anchor is a Maximum Flow Tubing anchor, the Triaxis Hydraulic Bear Anchor provides Hi- Flow bypass.

When you are unable to rotate your tubing on install because of deviations or long horizontal runs

The Triaxis Hydraulic Bear provides the optimum way to set tension when running a gas separator.

Large bypass makes The Bear ideal for use in wells that have a problem with sand, wax or wellbore debris issues. Easily allows for flushing past the anchor to clear the casing obstructions while providing the large flow for gas exiting the separator to the annulus.

- Serviceable – shear pins are field serviceable
- Large Annular bypass
- Q125 Mandrel
- Corrosion resistant coatings on request to meet wellbore conditions
- Manufactured to Industry standards ISO API
