Triaxis Python Rod Puller

Your Safe and Secure Method of Unseating your Pump

The Triaxis Model STR-73-118 Python Rod Puller

Introducing the Python Rod Puller. A Safe and Reliable way to remove your pump and rod string.

When used as intended, especially with a 2-7/8" EUE connection, The Python Puller significantly reduces the risk of the rod shooting out uncontrollably when unseating or pulling a rod pump on a deep rod string.

The Python Puller allows rods to be pulled inline with the tubing elevators.

Triaxis manufactures in accordance with industry standards API 5CT and API 11B. The Python Rod Puller can handle a maximum pulling force of 112,000 lbs. or 50,000 daN. Built from 4145 HTSR with a maximum strength 140,000K, this tool is designed to make work safer and more efficient when dealing with the rod pump and rod strings.
